

AROMA DIFFUSER

H-03/H-03P

PRODUCT MANUAL

Before using product, please read this instructions carefully and safe-keeping.

Notes:

Do not disassemble the device by yourself;

It is strictly forbidden to tilt or invert the equipment that is working and contains essential oils;

Do not use other non-standard power supplies. otherwise the device will be damaged.

Do not use this equipment in extreme environments such as high temperature, excessive humidity;

Do not install/place the device in an area where children can easily reach;

Do not add essential oil from the fogging place, otherwise the machine will not be atomized normally, and the serious situation will cause damage to the machine;

When replacing essential oils, please pay attention to whether the gasket at the bottle mouth installation is off or damaged. If it is off or damaged, it should be replaced in time;

If the machine is not used for a long time, remove the essential oil and unplug the battery;

Since the device itself has a certain weight, please do not install the device in an unstable place to prevent the device from falling.

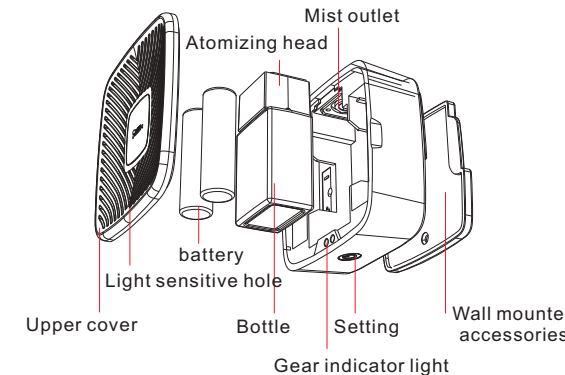

COMMON TROUBLESHOOTING

Malfunction	Exclude
No atomization	Whether the power is connected, whether the atomizer is damaged, and whether the equipment is adjusted to atomization mode.
Small amount of atomization	Check if the atomizer is aging and replace it with a new atomizer head if necessary.
Fragrance spray spouting liquid	Check if there is any accumulation of dust, moisture, etc. on the atomizing plate. Use a cotton swab dipped in alcohol to clean the atomizing plate.
Essential oil leak	Whether the essential oil bottle is loose, gasket at the mouth of the bottle is damaged, and atomizing head is damaged.
The device emits abnormal noise	Confirm if the atomizer is damaged or stuck by foreign objects

Voltage/Power	AA battery*2, 100mW	DC 5V 1A/ 14500 Lion battery*2, 200mW
Coverage	30m³	100m³
Bottle capacity	25ml	80ml

PRODUCT OVERVIEW--H-03

PRODUCT OVERVIEW--H-03P

INSTRUCTIONS

MODEL		H-03(25ml)			H-03plus(80ml)		
Gear indicator light interval							
Atomizable Days reference value	Off sensitivity Light on	21days	14days	7days	33days	22days	11days
	On sensitivity Light flashing	33days	22days	11days	52days	35days	18days

- Start the device: Install the battery and enter the "battery swapping mode" (flashing red and green alternately). You must lightly touch the function key to enter the running mode;
- Touch the function key to switch between four modes (green light mode, yellow light mode, red light mode, and off light standby mode), with the first three being atomization mode (specific parameters refer to the table above). When the light is off standby mode, the device is in low-power standby mode without atomization;
- Long press the function key: turn on the light sensor (the indicator light is in the breathing light state, and it will only atomize when there is a certain ambient light) and turn off the light sensor (the indicator light is constantly on, and it will atomize for 24 hours)
- This machine can be used for standing on a desktop or wall mounted installation (with adhesive backing)
- Charging indicator light: The charging indicator light is red and turns off when fully charged.

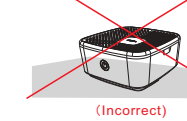

The H-03 Plus model uses a detachable rechargeable lithium battery (must use the 14500 lithium battery provided by our company or certified for safety on the market), which can be charged directly using the magnetic charging cable of the accessory, or by removing the battery and using a lithium battery charger compatible with the 14500 model.

Attention: 1. The H-03 plus is equipped with two 14500 lithium batteries, one or two of which should be installedThe battery saving device can operate without using AA dry batteries.

Do not lie down to avoid essential oil leakage

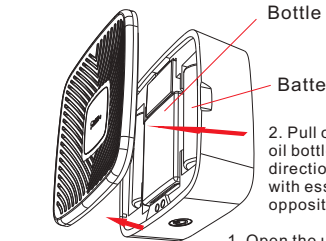

(Correct)

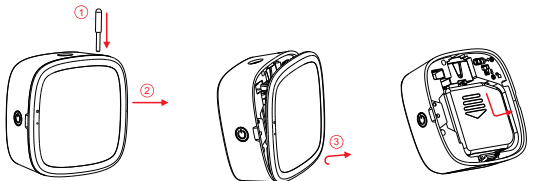

(Incorrect)

H-03 ESSENTIAL OIL REPLACEMENT

- Open the upper cover and remove two batteries
- Pull out the empty essential oil bottle towards the top cover direction, install the bottle filled with essential oil in the opposite direction

H-03P ESSENTIAL OIL REPLACEMENT

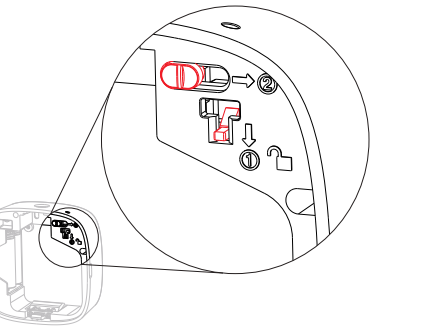

1. Insert the included iron rod into the small hole on the top, hold it firmly, and at the same time pinch the upper part of the front cover and pull it outward.

4. Pinch the atomizing head and take it out flush

5. Turn the atomizing head counterclockwise and replace with essential oil

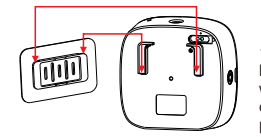

H-03 ESSENTIAL OIL REPLACEMENT

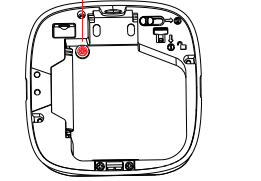

Release the front cover latch: According to the body pattern, 1. Pull down the latch and do not release it; 2. Turn the toggle button to the right to lock the latch, and the front cover can be opened directly without the need for an iron rod.

To restore the locking mode, turn the toggle button to the left to open it.

H-03P WALL MOUNTED INSTALLATION

3. Anti theft screws: Remove the front cover and turn the loose screws in the picture clockwise for 3-4 turns (note: no need to tighten them forcefully) to firmly fix the body to the wall mount.
